

## **Position Green included in Deloitte's Fast 50 for the third year in a row**

Malmö, Sweden, 19 November 2025

**Position Green, a Nordic leader in ESG software, has once again been recognized as one of Sweden's fastest-growing tech companies on Deloitte's Technology Fast 50 list for 2025.**

With a growth rate of over 1,000 percent over the past four years, the recognition underscores Position Green's continued momentum in making sustainability a core part of business strategy and value creation.

Deloitte, in collaboration with Citi, presents its Sweden Technology Fast 50 ranking annually to highlight the country's most rapidly growing technology companies. The ranking is based on revenue growth over the past four years and includes both public and private companies across all areas of the tech sector. Position Green is one of only four companies in this year's ranking to have qualified for the third consecutive year — a testament to its sustained growth and expanding market leadership.

"We're proud to be recognized by Deloitte among Sweden's top growth companies. It reflects the growing demand for sustainability solutions that deliver measurable ROI and real business value — going beyond compliance,"

says Daniel Gadd, Co-founder and CEO of Position Green.

"Our mission is to help businesses connect sustainability performance with financial performance, turning data into strategic advantage. I'm deeply proud of our team for continuing to make that vision a reality."

Position Green's achievements this year extend beyond Deloitte's Fast 50 recognition. The company was also featured in Gartner's Buyer's Guide and Verdantix's Green Quadrant for ESG Data Management & Reporting Software — further demonstrating its commitment to helping organisations manage, report and act on sustainability data with confidence and impact.
